19 DEC 1990

Dear Mr. Josepfs:

Re: L.E. Carpenter

This letter confirms our phone conversation of December 5, 1990 regarding any additional RI work that may be necessary due to contamination detected in subsoil on Wharton Enterprise property. It was agreed that any additional investigatory work needed to describe further the extent and/or matter of the contamination after supplemental RI has been accepted (with conditions if necessary) shall be performed during the remedial design phase of the project in order not to delay the progress of the project toward a ROD in September 1991. There is now sufficient information to determine what remedial measures/alternative are suitable to cleanup the L.E. Carpenter site.

Thank you for your understanding and agreement on this condition.

Very truly yours,

Edgar G. Kaup, P.E., Case Manager
Bureau of Federal Case Management
